
HOK

HOK is an international architecture; urban planning and development firm founded in 1955 in the United States, which now has 23 offices around the world. The company employs 1,700 people in a network spread over 3 continents. HOK's mission within the Tunis Bay project is to provide innovative ideas and exceptional design solutions, creatively responding to the expectations and needs of future Tunis Bay residents, highlighting everything that improves environmental stewardship, creates added value, promotes science and the arts and gives the project a unique aspect. HOK's solutions for the Tunis Bay project emerge from a collaborative process that encourages its multidisciplinary professional teams to seek alternatives, share their knowledge and imagine new ways to meet the challenges of the built environment. The Dubai Marina, one of the largest riverside communities in the world, is one of the projects planned and designed by this office. HOK also designed the fourth phase of Doha's Msheireb Downtown phase, an innovative project based on heritage and sustainability.

STUDI International

STUDI International is one of the largest Tunisian engineering firms in Africa and forms the Group with its subsidiaries STUDI. Established in more than ten African countries, and in France, STUDI International operates in more than thirty countries. Diversified and multidisciplinary, the STUDI Group operates in all fields of engineering (transport infrastructure, water, energy, oil and gas, telecommunications, agriculture, land use planning, environment, architecture and urban planning) and the economy (institutional, strategic and sectoral studies). In the implementation of the Tunis Bay project, STUDI plays a crucial role in the study of the infrastructure works of the 4 phases, from the preliminary study, to the preliminary summary project study through to the detailed preliminary project study and environmental and social impact study. STUDI is also in charge of supervising, controlling and monitoring the infrastructure works carried out by SOROUBAT: roads, landscaping, dry networks (telecom, street lighting and natural gas) and wet networks (drinking and non-drinking water, wastewater and stormwater).

AWA Partners

Architects Ahmed Chatti and Amine Turki founded architecture firm Awa Partners in 2008, with the ambition to provide urban planning, architectural and interior design solutions. Tunis Bay Project Company has called on the duo's services for the excellence of their designs and high level of involvement during all phases of the design and construction processes. AWA Partners is committed to leaving its mark on the various aspects of the Tunis Bay project, starting with its general appearance, down to the smallest detail. AWA Partners' role does not stop with participation in the overall design of Tunis Bay; the office also promotes a technical and creative approach covering the different aspects of the conceptual process. Through its vast network of engineers, designers and project managers, AWA Partners' design team is a catalyst, seeking the resources and alliances necessary to achieve the objectives set by Tunis Bay Project Company.
